POSTMAN and REST Assured
API testing
Agile Methodologies
Black Box testing
Functional Testing
Interoperability Testing
GUI testing
Integration Testing

OS:

Windows, Linux (Fedora, HP-UX, FreeBSD, RHEL), Mac

Tools:

Jira, Confluence, Selenium, WebDriver, Appium, TestNG, Jenkins, Git

Education

Work Experience

QA Lead

Girnar Software Pvt. Ltd. (CarDekho), Bangalore

March 2022 – November 2022

- Apart from creating test scripts and for automation framework, I managed scrums, sprint boards, patch releases for the entire CarDekho platform.
- Used Java/python with selenium and Appium Webdriver to automate smoke suits of Used Car Retail of CarDekho.
- Proficient in using pytest to write and run automated smoke test cases.
- Conducted API testing for API built using REST assured libraries using POSTMAN for non UI featured functionalities
- Experience in handling kafka for lead checking and generation for UCR
- Lead the team using strategies like war room sessions across organization to capture bugs and construct roadmaps to successfully handle automation and manual tasks of UCR (Used Car Retail) platform.
- Built the team by handling new hires and handled performance metrics at every release.

QA Automation Engineer

Flipkart India Pvt. Ltd., Bangalore

Nov 2019 – Mar 2022

- Designed the entire automation framework for SHOPSY, FK REFURB from ground up.

Dr. Babasaheb Ambedkar
Technological University,
Mumbai
June 2013 - May 2017

**D.A.V Public School,
Mumbai - HSC.**

June 2012 - May 2013
Achieved 70% with Math and
science as core subjects

**D.A.V Public School,
Mumbai - SSC.**

June 2011 - May 2012
Achieved 90%

Awards and Recognition

Received master of
ceremony award at national
level in NIC camp

Successfully completed
C-cert in National Cadet
Corps

- Used Java/python with selenium and Appium Webdriver to automate smoke suits of Used Car Retail of CarDekho.
- Proficient in using pytest to write and run automated smoke test cases.
- Conducted API testing for API built using REST assured libraries using POSTMAN for non UI featured functionalities
- Devised test suites, E2E tests, API testing to find vulnerabilities and memory leak testing to optimize experience for mass traffic.
- Collaborated with designers to compare design metrics using Zeplin and Figma.
- Lead the entire deployment and release cycle to deliver on time deployment.
- Maintained release notes for all the production releases.
Successfully tested and deployed 'SHOPSY' and FK-REFURB a social commerce platform for live traffic

QA Assurance Engineer
Flexera Software LLP, Bangalore

Jul 2017 – Aug 2019

- Used scripts for UI automation using selenium WebDriver, devised Perl scripts for testing and penetration testing tools like Wireshark and Burp tool on products to track failure analysis.
- Collaborated with developers to enhance performance and tracking regression bottlenecks.
- Analyzed failed test cases, recorded results and generated reports.
